

HENRIETTA RECREATION CENTER

Construction Update

Phase One Progress:

January 2016

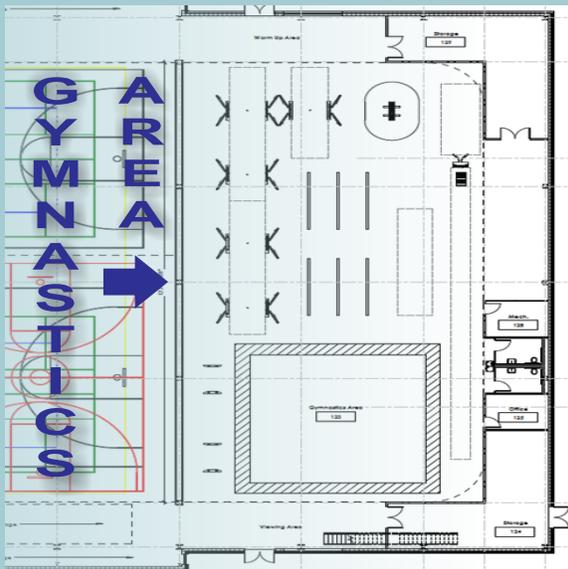

The mild winter weather has helped move construction along quickly at the new Recreation Center. A groundbreaking ceremony was held in late December which was attended by enthusiastic residents, Henrietta Councilmen, Town employees and the media. "This is a special day for Henrietta" said Supervisor Jack Moore. "No one deserves this Recreation Center more than our residents." Moore went on to stress how the Town is committed to improving the quality of life in Henrietta through this and many other initiatives.

Town employees played a significant roll in preparing the site for construction. Their efforts, as well as the donation of several pieces of equipment by Rich & John LeFrois - LeFrois Construction, Mike Spoleta - Spoleta Construction, Frank Imburgia - FSI General Contractors and Bob Morgan - Morgan Management helped save thousands of dollars in this phase of construction.

Supervisor Moore thanks all who attended the December Recreation Center groundbreaking

Gymnastics is one of the most popular recreation programs. It is currently being held in rented space that is significantly undersized and fails to adequately meet the overall program needs. The new Town Recreation Center will have a dedicated Gymnastics area to serve all of the needs of the Town. According to Jason Kulik, Director of Parks & Recreation, "Gymnastics is our biggest and most popular program by far and will be a major component to the new Recreation Facility".
