

# HENRIETTA RECREATION CENTER

Construction Update

## Construction Continues:

February 2016

The foundation and underground utility work is nearing completion at our new Recreation Center. The milder winter has helped keep the building schedule at a steady pace. Steel framing for the building will begin in the last part of March. At that point the Recreation facility will begin to take shape.

Excitement is growing with every stage of this project. From pre-schoolers to senior citizens, the new Recreation Center is sure to become a central hub for many town activities. If you have comments or questions about our new Center, please feel free to contact Todd Baker at [tbaker@henrietta.org](mailto:tbaker@henrietta.org).

## Did You Know:

During the planning stages for the new Town Recreation Center, many elements were incorporated into the final design. One of the more unique features of the center will be the multipurpose and preschool rooms. The multipurpose/meeting room will have a kitchenette and a wall divider that can be opened to the preschool area if a larger space is needed. The space will be a great venue for family friendly gatherings, educational sessions, conferences, meetings and other events. Room reservation procedures and fees will be announced prior to the Centers opening.
