

HENRIETTA RECREATION CENTER

Construction
Update

Warm Weather Means The Pace Quickens:

May 2016

Spring weather has arrived and the construction pace continues to grow at our new Recreation Center. The building is quickly taking shape and the outer walls have begun to be constructed. The roof is in place which has allowed work to begin in the interior. Utilities are being laid and the walking track is in place.

You can also see the entryway coming together with the unique rotunda that dominates the right front side of the Center. Its dramatic round shape will provide a welcoming main entrance to the facility.

The pictures below help tell the story and illustrate the progress. We have also posted video on the Town facebook page to give you a current view of the construction progress.
